Profile

Skilled full-stack developer with 2+ years of experience in developing and maintaining web applications. Proven ability to lead and mentor a team of developers, and to deliver high-quality products on time and within budget.

Employment History

Back End Developer, Axolotls Innovative Technologies, Pune

NOVEMBER 2020 – APRIL 2023

- Worked on a Multi-Level Marketing (MLM) project built on the CodeIgniter framework. In this role, I developed and maintained a comprehensive system for tracking MLM business activities, including member recruitment, compensation plans, and performance analytics. My responsibilities included frontend and backend development, database management, and ensuring the system's scalability and reliability for MLM businesses.
- Experience creating APIs and granting access to Android developers. In this role, I designed and developed RESTful APIs to enable seamless communication between Android applications and backend services. This involved defining endpoints, handling data requests and responses, implementing authentication, and ensuring data security.

Project Manager, Msarii, Pune

MAY 2022 – SEPTEMBER 2023

Experience with the "TOS" project, a driving school management system for the UAE. I have worked on both frontend and backend development using PHP, created a grade tracking system, and configured it to run offline on an IIS server.

Managed a team of 4-5 developers in completing the sprint and allocated task
