Objective: -

To secure a software engineer position as a Laravel web developer, utilizing my expertise in Laravel, along with my proficiency in web development technologies. I aim to contribute to the development of scalable and high-performing web applications while continuously expanding my skills and delivering exceptional results within a collaborative team environment.

Academic Qualifications: -

- Post-Graduation M.Sc. (**Information Technology**) passed from Babasaheb Bhimrao Ambedkar University (**A Central University**) in 2018 with an aggregate of 82.2%.

Summary: - Roles and Responsibilities: -

- Having 3+ years of experience as Software Engineer in Web Development technologies.
- Developed and maintained a robust web application using Laravel and CodeIgniter frameworks, ensuring high performance and scalability.
- Utilized MySQL for database management, including designing efficient database schemas, writing queries, and optimizing database performance.
- Integrated AWS services such as EC2, S3, and RDS into the application architecture to ensure secure and scalable hosting and storage solutions.
- Designed and implemented RESTful APIs to facilitate seamless data exchange between different modules of the application and enable integration with third-party systems.
- Collaborated with cross-functional teams, including managers, designers, & QA engineers, to gather requirements, plan features, & deliver software solutions within project timelines.
- Resolved bugs, identified performance bottlenecks, and conducted code reviews to maintain code quality and ensure adherence to best practices.
- Implemented WordPress themes and plugins to meet specific client requirements and create dynamic and engaging websites.
- Conducted regular maintenance tasks, including security updates, performance optimization, and data backups, to ensure smooth operation of WordPress websites.
- Having Experience in documentation and Agile process
- Having experience in Coding and Unit Testing.
