WORK EXPERIENCE

Frontend - Angular developer
Incepteo

06/2022 - Present   *Hyderabad*

Project Name: Collude

Achievements/Tasks

- Designed and developed the application including several modules using the Angular framework along with HTML, CSS, JavaScript, and Typescript.
- Implemented signup and login functionality using both OTP and password methods for enhanced security and user authentication.
- Created a timer for resending OTP, improving the user experience and ensuring successful login attempts.
- Worked on reactive forms to handling form inputs whose value change overtime.
- Developed tagging feature for the comment system, allowing users to tag other users and improve communication efficiency.
- Implemented comment, reply comment, edit, and delete functionalities, enhancing the interactivity and user engagement of the application.
- Created a desktop application using Angular, Electron FrameWork, resulting in a cross-platform solution.
- Utilized input/output decorators to manage data flow between components, ensuring efficient communication and state management.
- Used SVN as distributed version control system as code repository and MIRO for referring to mockups for development.
- Used postman to check response of various API'S as a visual documentation for backend.
