Databases **:** SQLite, MYSQL

Fronted Tools : Angular, HTML5, CSS3.

Operating Systems : Windows 10

EDUCATIONAL QUALIFICATION:

I completed my graduation in BSc computers science from Rayalaseema University in 2020 Kurnool

Project Details :

Project : TicketBot

Technologies: 1. Front-end : Angular
2. Back-end : SQLite
3. Middleware : Python (Django Rest Framework)

Description:

This web application will incorporate all requirements needed for the interaction between Project team (who work on the resources allocated) and IT support team (i.e. Network administrators, who provide requirements needed for the project people) and get the project team members problems solved, like installations, access to other resources across the network, etc. This integrates other services like online and 'any place' access of this application. It provides a complete concoction of solutions to all IT Service management problems like installations, network resource allocation so on and so forth. It will usher an environment which will not only provide unlimited services to the Project team but also help the Reporting Managers, IT Support team to function effectively and efficiently

Roles & Responsibilities:

- Development of the components using Angular
- Writing application interface codes using Python Django following Html5 and css3.
- Working Closely with the Back-End team to fetch the data and display in SQLite.
- Coordinating the development and QA validation.
- Participate in discussions involving the application creation and understand the requirements.

DECLARATION:

I hereby declare that the credentials furnished above are true to the best of my Knowledge and belief.
